Is your light plan SPRAY PAINT ON THE SUBFLOOR, or *this*?

We took **Sample Plan** and lit it two ways: the way most homes get wired today, and with **every fixture placed, room by room, at four budget levels**, before the drywall goes up.

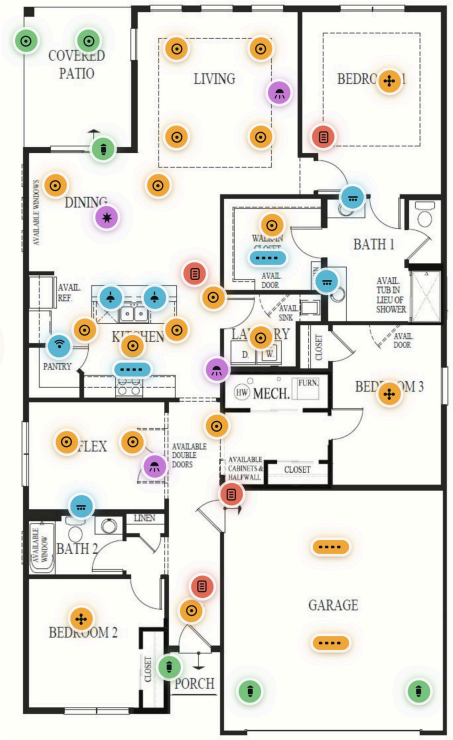

TODAY — BUILDER STANDARD

15 circles. One box, one switch per room, decided on site at rough-in.

vs

LIGHTPLAN — LEVEL 4 · 43 FIXTURES

Ambient · Task · Accent · Exterior · Controls

ONE PLAN · FOUR LEVELS

Your client picks a level. The plan lights up to match.

L1 Light It Right
$3.5k – 5.5k
Dimmable recessed and fans in every room

L2 Live & Work
$6.5k – 9.5k
Island pendants, under-cabinet, vanity, closets

L3 The Designed Home
$10k – 14.5k
Chandelier, art accents, porch & patio

L4 Whole-Home Smart
$15.5k – 22k
Scene keypads: Welcome, Entertain, Goodnight

Planning estimates for this plan. DMF, WAC and Lutron fixtures, finalized at your design review.

	SPRAY PAINT	LIGHTPLAN
When it's decided	○ On site, at rough-in, by whoever is holding the can	● At selections, on paper, with your client
What goes in	○ One light in the middle of each ceiling	● Layers: ambient, task, accent, exterior, controls
What your client sees	○ Nothing, until the lights go on	● Their own home, lit, before they choose
What it costs	○ Found out later, in change orders after drywall	● A planning budget for each level, up front

This one is yours to keep.
Which plan should we light next?
I'll call this week to walk you through it.
