LIVEWIRE

LIGHTPLAN · LIGHTING DESIGN FOR BUILDERS

See the lighting before the *drywall* goes up.

Send us a floorplan. We'll send back **every fixture placed, room by room, at four budget levels**, so your clients choose their lighting by seeing it, while the walls are still open.

SAMPLE · 3 BED + FLEX — LEVEL 4 · 43 FIXTURES

Ambient · Task · Accent · Exterior · Smart control

ONE PLAN · FOUR LEVELS

Your client picks a level. The plan lights up to match.

Every level builds on the one before it. Same house, same drawing, a clear price at each step.

L1 Light It Right — $3.5k – 5.5k
Dimmable recessed and fans in every room

L2 Live & Work — $6.5k – 9.5k
Island pendants, under-cabinet, vanity, closets

L3 The Designed Home — $10k – 14.5k
Chandelier, art accents, porch & patio

L4 Whole-Home Smart — $15.5k – 22k
Scene keypads: Welcome, Entertain, Goodnight

Ranges shown are planning estimates for this sample plan. Fixtures from DMF, WAC and Lutron (RadioRA 3, HomeWorks, Ketra), finalized at your design review.

WHY BUILDERS USE IT

- **Decisions before rough-in**, not change orders after drywall.
- **A clean upgrade path** your clients can see and say yes to.
- **Locations pre-wired** so later levels drop in without opening walls.

01
Send a floorplan
A PDF, CAD export or even a phone photo of the plan set.

02
We lay out the lighting
Every fixture placed on your drawing, at all four levels, in days.

03
Walk your client through it
Pick a level together. Your design-session retainer credits 100% to the project.

Have a project coming up?
Send us the plan. We'll light it.
The first plan is on us, no commitment.
